

Configuration Management

The PM shall use a configuration management approach to establish and control product attributes and the technical baseline across the total system life cycle. *This approach shall identify, document, audit, and control the functional and physical characteristics of the system design; track any changes; provide an audit trail of program design decisions and design modifications; and be integrated with the SEP and technical planning.* At completion of the system level Critical Design Review, the PM shall assume control of the initial product baseline for all Class 1 configuration changes.

DoD Instruction 5000.02, Encl 12

Initial Product Baseline

Developed during CDR.

Finalized during PCA.

Initial Product Baseline describes:

- Functional and physical characteristics
- Any joint and combined operations involvement
- Functional and physical characteristics used in testing
- Tests required configuration item
