

# Circulation and Diffusion Studies in the South China Sea

PI: Peter C. Chu ([pcchu@nps.edu](mailto:pcchu@nps.edu)), Sponsor: ONR (Manager: Tom Curtin)

1995-1996, Funding Level: **\$60,000**

## Brief Description

Carry out dynamical studies on the circulation and diffusion in the South China Sea (SCS), especially combined effect of the monsoon and the Kuroshio intrusion on the SCS circulation and thermohaline structure.

## NPS Theses

- (1) Tseng, Hsing-Chia, "[South China Sea warm-core and cold-core eddies detected from the Navy's Master Oceanographic Observation Data Set \(MOODS\)](#)," MS in Physical Oceanography, September 1995.
- (2) Edmons, Nate, "[South China Sea ocean circulations simulated by a primitive equation model](#)," MS in Meteorology and Oceanography, September 1996
- (3) Nicklin, Michael, "[A study of the relationship between south Asian monsoon convection and tropical upper easterly jet using INSAT data](#)," MS in METOC, December 1996.
