Mine Burial Prediction (Physically Based Modeling)

Mine Burial Expert System Model (MBESM) by Rennie and Brandt

Mine Impact Burial Experiments

- NPS Mine Impact Burial Experiments (1/12-th Size)
- NSW-Carderock Mine Impact Burial Experiment (1/3 Size)
- German Baltic Sea Experiment (Full Size)
- French/German Nearshore Experiment (Full Size)

Site of Experimentation

- 15 meters water depth
- sandy bottom
- STRONG WAVE EFFECT

FWG Burial Recording Mine - Procedure

N : number of buried sensors

Burial estimates

$$\frac{h_m}{D} = 0.5 - 0.5 \cos\left(\frac{\alpha_1 + \alpha_2}{2}\right) = 0.5 - 0.5 \cos\left(\frac{\pi N}{12}\right)$$

$$\frac{h_1}{D} = 0.5 - 0.5 \cos(\alpha_1 - \alpha_r)$$

IMPACT BURIAL MODELING

New Development of 3D Model

IMPACT35

Momentum Equation in E-Coordinate System

$$\frac{d}{dt} \begin{bmatrix} u \\ v \\ w \end{bmatrix} = - \begin{bmatrix} 0 \\ 0 \\ (1 - \rho_w / \bar{\rho}) g \end{bmatrix} + \frac{1}{\bar{\rho} \Gamma} \begin{bmatrix} F_x \\ F_y \\ F_z \end{bmatrix},$$

Moment of Momentum Equation in M-Coordinate System

$$\mathbf{J} \cdot \frac{d\boldsymbol{\omega}}{dt} = \mathbf{M}_b + \mathbf{M}_h ,$$

Gravity Cores During Mine Impact Burial Experiment (5/21/2000)

Model-Data Comparison

Predicted Burial Depth Comparison Using MIBEX Data

Conclusions

- IMPACT35 has capability to predict the COM position and mine orientation in the water column.
- The sediment part of IMPACT35 needs improvement
