

JMNO

JOINT MOBILE NETWORK OPERATIONS

JOINT MOBILE NETWORK OPERATIONS

Phase I Plan 13 July 2006

UNCLASSIFIED

Col Kavin Kowis, USMC
Joint Test Director
kavin.kowis@jmno.net

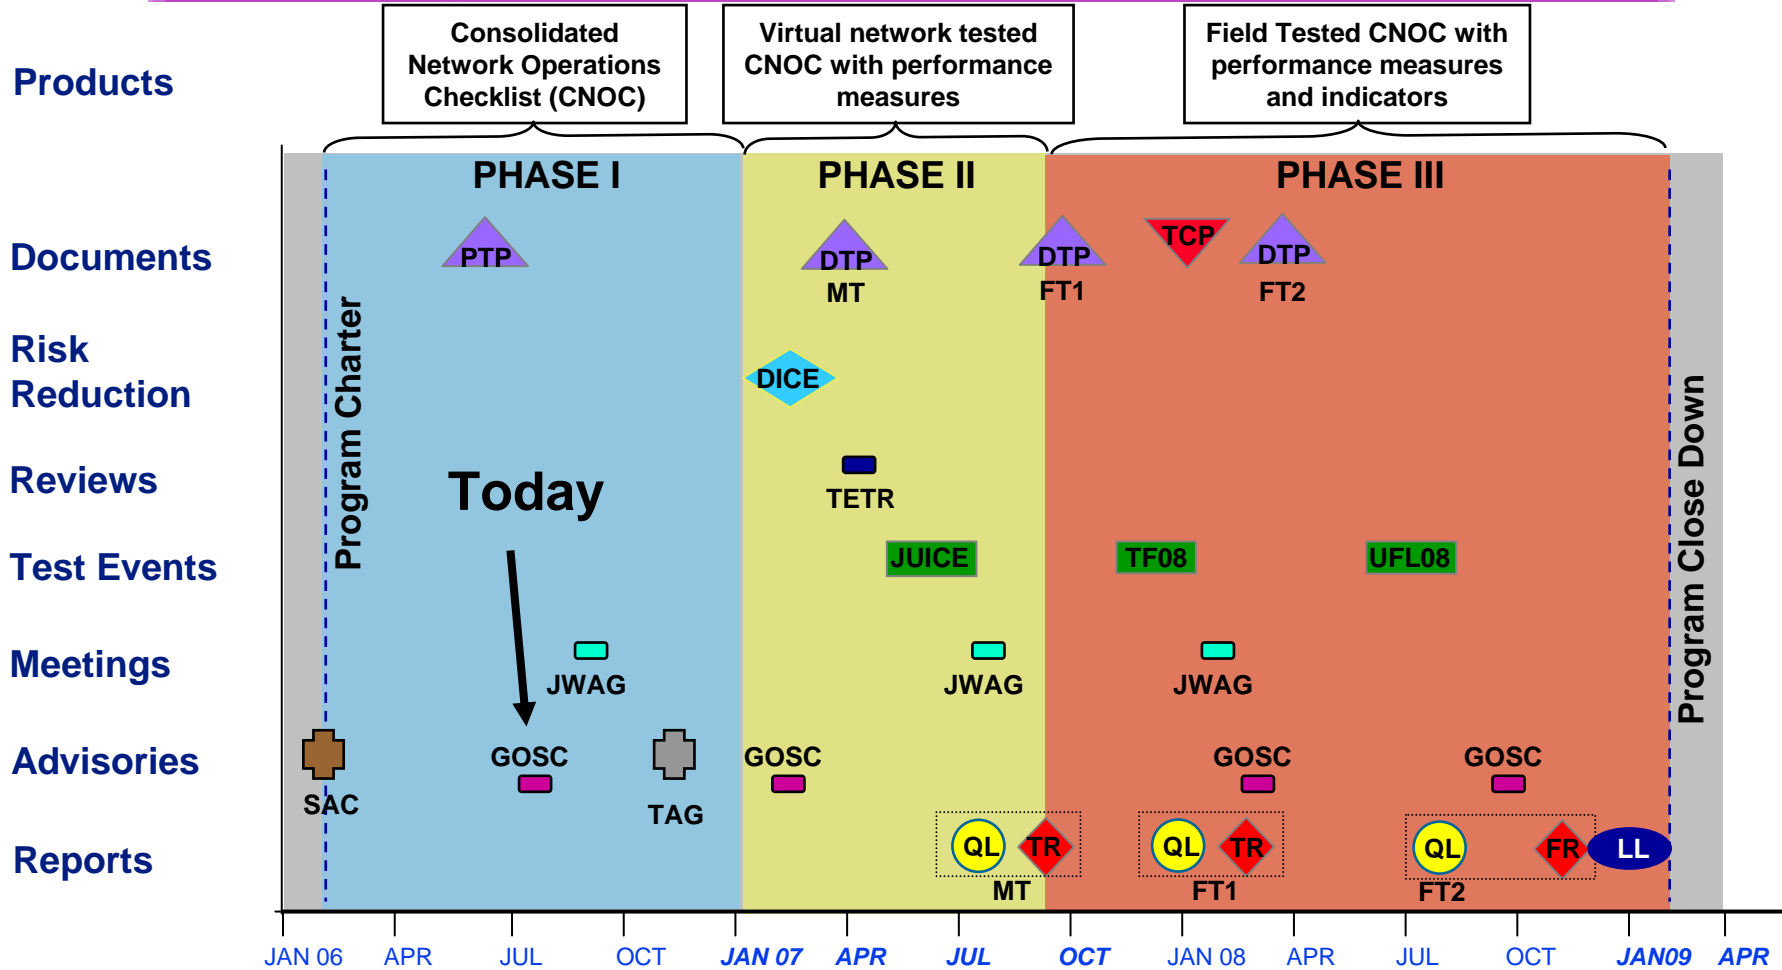

Mr. J.D. Wilson GS-15
Technical Director
jeffrey.d.wilson@usmc.mil

Dr. George Nobles
Senior Program Manager
george.nobles@jmno.net

Schedule

PTP = Program Test Plan
 MT = Mini-Test
 LL = Lessons Learned Report
 RR = Risk Reduction
 TAG = Technical Advisory Group
 TF = Terminal Fury
 DICE = DoD Interoperability Communications Exercise

DTP = Detailed Test Plan
 FT = Field Test
 FR = Final Report
 TAB = Technical Advisory Board
 TCP = Test Closedown Plan
 TETR = Test Event Technical Review
 JUICE = Joint Users Interoperability Communications Exercise

TR = Test Report
 QL = Quick-Look Report
 SAC = Senior Advisory Committee
 GOSC = General Officer Steering Committee
 JWAG = Joint Warfighter Advisory Group
 UFL = Ulchi-Focus Lens

Overview

- **Situation**
 - Orientation
 - Purpose
- **Mission**
 - Objectives
- **Execution**
 - Research methodology
 - General Office Steering Committee (GOSC)
 - Joint Warfighter Advisory Group (JWAG)
 - DODAF Development (OV & SV)
 - Joint TTP/CNOC Development
 - Technical Advisory Group (TAG)
 - Tabletop event
 - Phase I report
- **Administration & Logistics**
 - References
 - Tools
- **Command & Signal**
 - Process
 - Schedule

Situation

- **Orientation:**

- JMNO is chartered for **three years** to investigate, evaluate, and make recommendations to improve mobile network access and maintain current performance by identifying and developing joint doctrine and recommending DOTMLPF changes

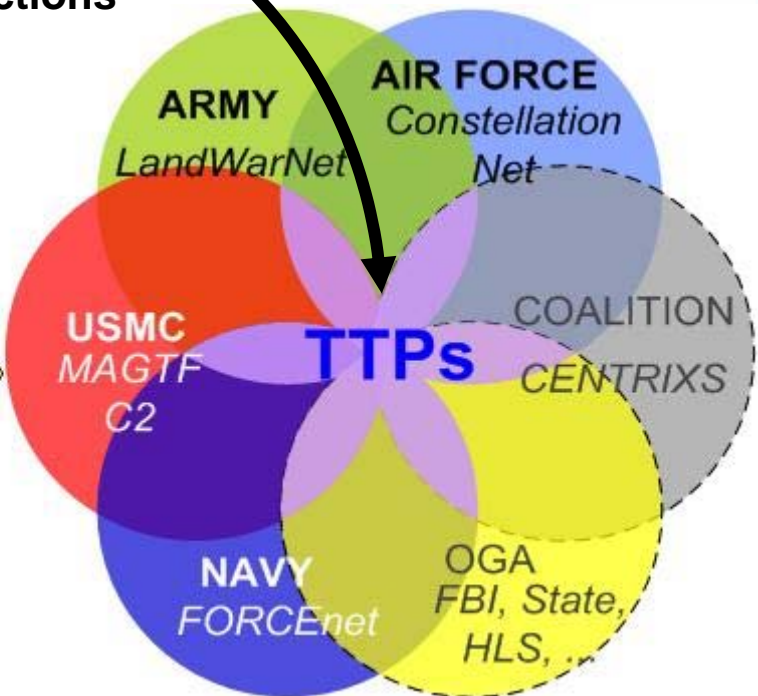

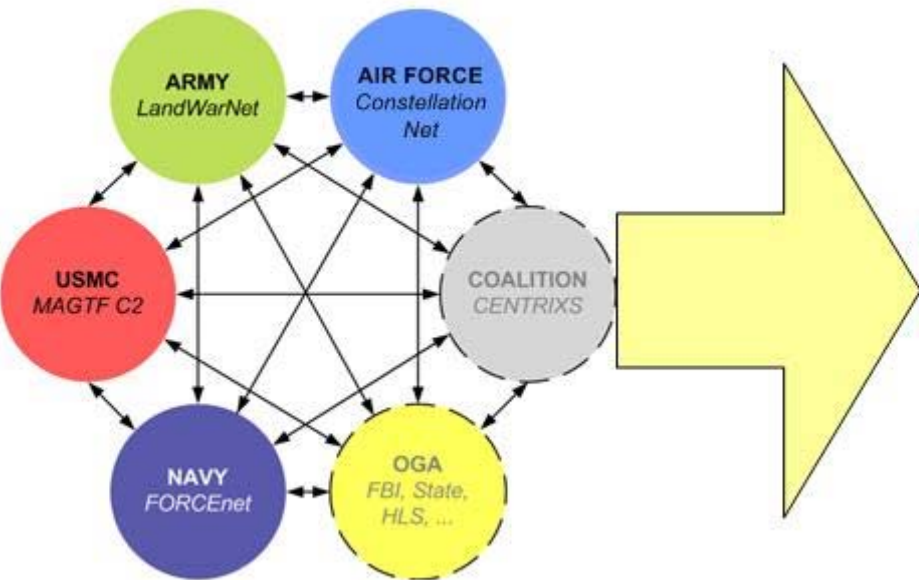

- **Mission: The mission of Phase I is to develop:**

- **Consolidated Network Operations Checklist (CNOOC)** as the JMNO test article
- **CNOOC** must be developed in order to proceed on to the events of Phase II and beyond

Plan of Attack

Joint Standards and Procedures allow access through a "Joint zone"

- Separate and multiple "bi-lateral" connections
- Negotiation time about **6 months**

Joint TTP Standards Handbooks For Network Operations

Standardized Annexes Across COCOMS

Coordinated TTPs between DoD and OGA/Coalitions

Possible CJCS Manual or Instructions

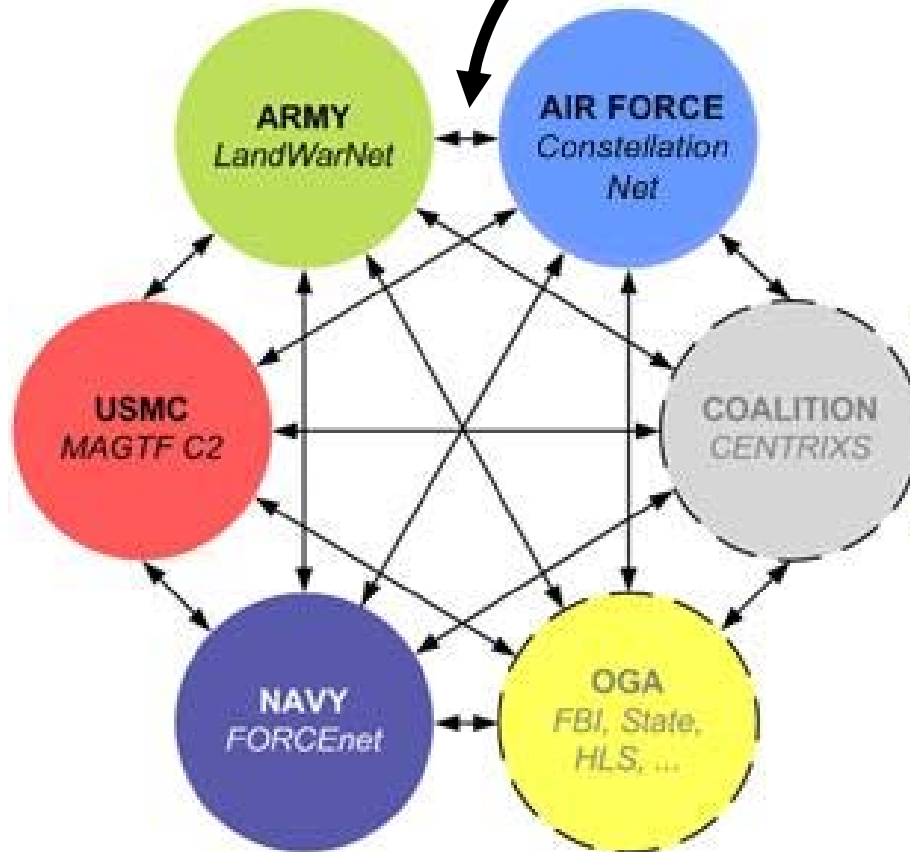

Basic Premises:

- **Will not change** Service (OGA or Coalition) internal networks
- **No specific materiel solutions**

What is a Joint TTP?

Each arrow line represents a potential joint TTP that JMNO will investigate and test.

These joint TTP come from the Operating Forces where smart, aggressive communicators have used their equipment in innovative ways to increase network communications capability

JMNO is coordinating to collect these joint TTP from CENTCOM and each service

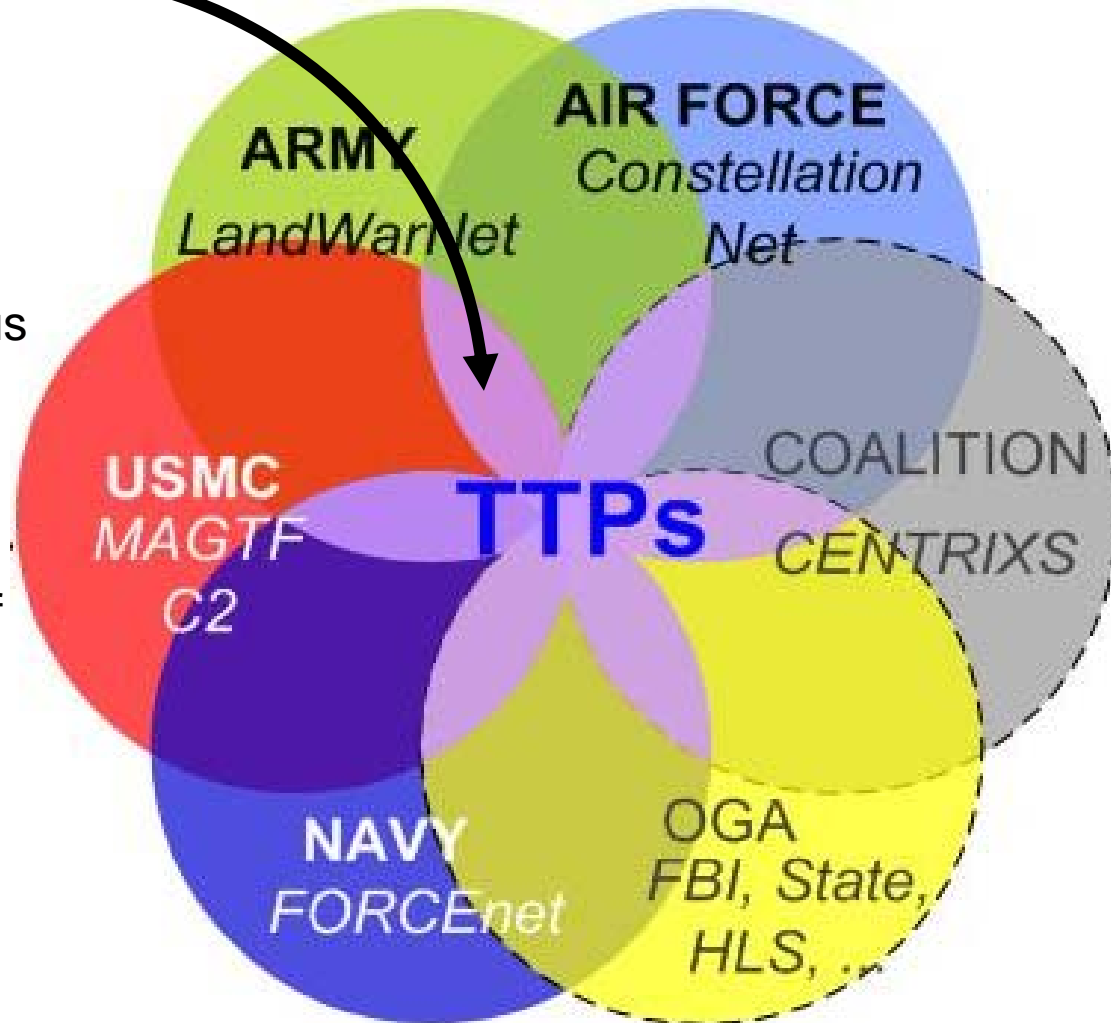

Additional joint TTP will come from academia and from the civilian business community

What is the “Purple Zone”

Once tested on a virtual network, the aggregated joint TTP form the JMNO “Purple Zone”

The “Purple Zone” is the “Consolidated Network Operations Checklist” (CNOC)

- The CNOC will undergo rigorous testing to identify the network performance envelope
- JMNO will provide an understanding of the impacts of connecting to “other networks”

Mission Objectives

- **Objective One: Develop and implement research methodology**
 - Identify the concepts for mobile NetOps that have been **successfully employed** by the four Services in a joint environment, and **similar concepts** that have been employed by industry and academia
 - Identify gaps and overlaps between Service architectures, policies, and procedures
- **Objective Two: Develop joint TTP/CNOC**
 - Develop initial mobile NetOps joint TTP. The initial joint TTP is the Consolidated Network Operations Checklist (CNOC) that will include the **step-by-step procedures and processes** for the access, transfer, and routing of services and information for network-to-network connectivity and user cross-network support
 - The CNOC will compile **Services' best practices** for network-to-network connectivity and user cross-network support
- **Objective Three: Test and analyze the initial joint TTP/CNOC**
 - Develop JMNO test lab to analyze and refine initial joint TTP/CNOC
 - Analyze CNOC on representative architectures
- **Objective Four: Phase I Report**
 - Prepare and deliver the Phase I report to:
 - Technical Advisory Group (TAG)
 - Joint Program Office (JPO)
 - GOSC

Execution

- **The objectives of Phase I will be accomplished through the continuous effort of the JMNO team using the following venues:**
 1. **Research methodology**: Developed by JMNO and vetted through the GOSC (Objective 1)
 2. **General Officers Steering Committee (GOSC)**: Senior advisory council to provide overarching program guidance and feedback (Objectives 1-4)
 3. **Joint Warfighter Advisory Group (JWAG)**: Provides warfighter perspective and input as primary stakeholders (Objectives 1-3)
 4. **Joint TTP/CNOC Development**: Product of research, DODAF analysis, Service SMEs, and JWAG (Objectives 2-3)
 5. **DODAF Development (OV & SV)**: Developed by Service SMEs and JMNO staff based on research methodology (Objectives 1-2)
 6. **Technical Advisory Group (TAG)**: Provides technical recommendations and guidance (Objective 4)
 7. **Tabletop Event**: Test & validate initial joint TTP/CNOC (Objectives 2-3)
 8. **Phase I report**: Documents results of research and JMNO test article for follow-on phases (Objective 4)

v1

Do you mean "four" objectives in the first line?
virginia.tompkins, 7/6/2006

Execution: Synergy Efforts

• “Top Down”

- **DISA/JTF-GNO: Digital ROE**
 - Understand issues & policies
 - Collect important data
- **Army Marine Corps Architecture Systems Engineering Group**
 - Systems functional decomposition
 - Collect Service architectures & IER requirements

(Objectives 1 & 2)

Leverage the appropriate external efforts to maximize mutual progress and speed access to information

• JMNO TTP Development

- MIT Lincoln Labs
- Naval Post Graduate School
- JMNO Network Lab

(Objectives 2 & 3)

• “Bottom Up”

- USMC: 8th Communications BN
- USA: 311th TSC, Battle Command Battle Lab
- USAF: TBD
- USN: TBD

Understand which COCOM or service policies the “tactical level” communicators used and collect data on what they specifically did in order to implement the policies

(Objectives 1 & 2)

Combine the “Top Down” and “Bottom Up” efforts and test the CNOC in the lab

Involve the “Tactical Experts”- JMNO will present a coherent picture of the HHQ and adjacent issues and get their input

Administration & Logistics

References

- JMNO Charter
- JMNO Program Test Plan
- Per JMNO JT&E SOP
- JT&E Handbook

JMNO training

All daily activities are conducted utilizing structured data collection and test analysis methods

Potential tools

- Joint C4ISR Architecture Analysis Team (JCAAT)
- System Architect Version 1.0 (current version)
- Combined Media Battle Analysis Tool (COMBAT)
- SIMPROCESS
- Statistical Package for the Social Sciences (SPSS)
- Statistical Analysis Software (SAS)
- Media Library System (MLS)
- NETWARS / OPNET
- C4ISR Toolkit

JMNO Testing Is a Daily Event

Command & Signal

- **Process**

- Request GOSC endorse this plan and provide guidance and support throughout execution

- **Schedule**

- The derived Phase I Schedule organizes activities to achieve the objectives listed in the Phase I Plan

Requests

JMNO requests GOSC member endorsement of the Phase I plan

- **JMNO requests GOSC member support to coordinate execution of the Phase I plan**
 - When JMNO encounters obstacles, we wish to contact your office to coordinate your advocacy on behalf of JMNO
