

Operations Research Seminar

Operations Research at the United States Marine Corps

Joe Mlakar

USMC Operations Analysis Division

This presentation will describe

- How the United States Marine Corps utilizes its NPS Operations Research graduates
- The perception of the NPS Operations Research degree program, as viewed by both the Marine Corps at large and the Marine Corps' Operations Research community
- Skills that a Marine Corps Operations Research Analyst needs to be successful in garrison and a deployed environment
- Support that Marine Corps Operations Research Analysts are providing to current operations in Iraq and Afghanistan
- Typical workload and specific examples of quick-turn analysis projects assigned to Marine Corps Operations Research Analysts deployed in support of operations in Iraq

Biography: Joe Mlakar is the Deputy Branch Head and Senior Analyst for the Current Operations Branch of the Marine Corps Operations Analysis Division at Quantico, Virginia. He also serves as the Occupational Field Specialist for Marine Corps Operations Research Analysts. He holds a B.S. in Mathematics from Carnegie-Mellon University and M.S. in Operations Research and Applied Mathematics from the Naval Postgraduate School.
