

Operations Research Seminar

The Role of Computation in the OA Curriculum

David Alderson

Operations Research Department
Naval Postgraduate School

Over the last two years, OR faculty involved with the “computation sequence” (OA2200/3200 and related courses) have been reviewing, assessing, and revising what and how we teach. This seminar has three objectives: (1) to present our findings and efforts to date; (2) to solicit feedback from the broader OR faculty; and (3) to open a discussion about the role of computation in the OA curriculum.

Date: Thursday, October 30, 2008

Time: 15:00-16:00

Location: GL-115
