

SEED Center and Operations Research Seminar

Modelling & Simulation Projects from Simulation Team with Special Attention to Human Behavior Modelling and Intelligent Agents

Agostino G. Bruzzone
Professor
University of Genoa

Wednesday, November 18, 2009
12:00-12:50 in GL-115

This is an overview of Simulation Team MISS DIPTTEM Genoa activities with the presentation of a set of projects related to applying M&S (Modelling and Simulation) and IA (Intelligent Agents) into the following areas:

1. Homeland Security (i.e. Project MOSCA Modelling Supply Chain Attacks or SeaPorts a Simulation Model for Port Security Analysis).
2. Intelligence (i.e. Sibilla: a Serious Game titled Simulation of an Intelligent Board for Interactive Learning and Lofty Achievements).
3. Civil Disorders (i.e. Projects Rats Riots, Agitators & Terrorists by Simulation and/or PIOVRA Polyfunctional Intelligent Operational Virtual Reality Agents).
4. Virtual Port Simulation (i.e. ST_PT Simulation Team Portainer Simulator, ST_RS Simulation Team Real Time vehicles and heavy haul Simulator).

More information about the projects can be found at

www.simulationteam.com
